

CLEAR TOUCH INTEGRATED SOFTWARE

Chorus

Teach Without Limits

Clear Touch Chorus™ (formerly Canvas) is an interactive whiteboard application that combines impressive whiteboard, annotation, and presentation tools to provides a unified learning experience for students and teachers alike.

This powerful edtech solution gives users the ability to write on an infinite canvas and use a live browser that makes it easy to open, save, and access unlimited browsers within a single presentation. No more need to hyperlink, save bookmarks, or jump out of the presentation into third-party applications. Build everything within the Chorus environment and store the session in any of the leading cloud services. This robust software solution supports Mac, Windows, and Android platforms. It also supports flash player, which gives you access to a wide range of the most popular educational games.

Clear Touch Chorus™ gives teachers a convenient way to bring multiple assets into one space for fewer class distractions and easier lesson creation. Teachers no longer have to leave a

whiteboard feature to pull up other images, YouTube videos, or other websites. Instead, they can gather all digital resources needed into one space and then annotate, write, and create in one Chorus session during the class. Having all of this information in one place can reduce the time teachers spend with their back to the class while they search for items. After class is finished, the teachers can then save the lesson to the cloud for future use.

Specially designed to support learning in K-12 classrooms, Clear Touch Chorus™ combines the visual benefits of a traditional whiteboard with the innovation of the latest digital technology. Just power up your Clear Touch panel, open Chorus, and start teaching without limits.

FULL TOOLSET

Access on-screen calculators, rulers, graphing tools, and other STEM tools for enhanced interactive learning.

VIDEOS WITHOUT THE ADS

Chorus lets you add YouTube videos directly into the canvas while stripping out unwanted video ads, comments and suggested videos.

SECURE CLOUD-BASED STORAGE

Embrace the flipped classroom concept by recording audio and video for each session and saving it in the cloud.

EXPANDED VIDEO CONTROL

Easily project video from a document camera, tablet, or smartphone directly onto the canvas.

OPEN ALL MEDIA TYPES

Videos, pictures, flash games, notes, and more — Chorus gives you the flexibility to add any media type into a single workspace.

UNLIMITED LIVE WEB BROWSERS

Open as many self-bookmarking live browsers as you want, without leaving the application.

UNLIMITED SPACE, UNLIMITED CANVASES

There are no boundaries to a canvas and no limit to how many canvases you can create.
